

Approved December 16, 1999

Re-qualification Program Policy

The CMO offers a re-qualification program for candidates who were previously registered as midwives in Ontario. The program involves individualized assessment of midwifery knowledge and skills, and orientation to the current practice of midwifery in Ontario.

In each case, the Registrar and Registration Committee will determine appropriate assessment and orientation requirements based on:

- work experience in midwifery;
- familiarity with the Ontario model; and
- recent clinical experience in midwifery.

Rationale:

The registration regulation requires a member who no longer meets active practice requirements to undergo a re-qualification program.
